## ❖ Important Rules

1. Please do not **overwrite formulas**.

Only type values in columns without “**AUTO**” written above them.

2. Columns with formulas are shaded **gray**.

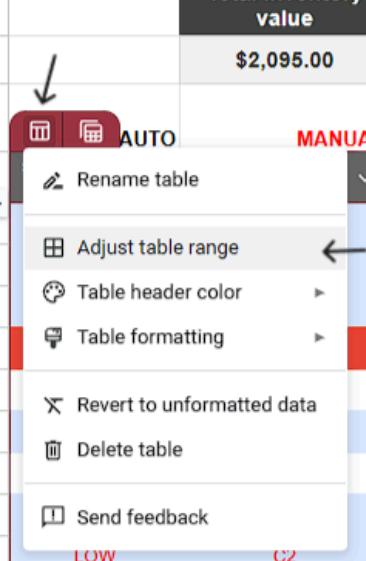

MANUAL: Yes/No. If 'Yes', the row will turn red.				
MANUAL	item_discontinued	stock_quantity	inventory_value	AUTO
50	no	53	\$530.00	OK
50	no	66	\$660.00	OK
50	yes	0	\$0.00	LOW
50	no	49	\$735.00	OK
50	no	80	\$1,200.00	OK

### 3. Keep data inside the table range.

Most formulas depend on the table range, so expanding the table properly is important.

#### How to Expand the Table Range

1. Click the **table symbol**.
2. Click **Adjust table range** to include new rows or columns.

return inventory value					
\$2,095.00					
	AUTO	MANUAL	MANUAL	MANUAL	MANUAL

	\$15.00	\$17.50	22	\$330.00

OR

Fill in the last row of the table → a new row will automatically include formulas.  
Please fill the data in the column without “AUTO” above it.

## ❖ Features

### ➤ Currency converter

All you need to do is click the down button on cell G2 in Inventory sheets. All the currency's column format will change according to the currency you selected.

	G	H	I	J
	Currency			
	USD	▼		
	Script cell			
tion	Stock Location	Unit Cost	Unit Price	Days per Reorder
		Script column	Script column	
tion	Tr stock_location	unit_cost_usd	unit_price_usd	days_per_reorder
culated	Storage A	\$10.00	\$17.00	Monday
atte finish	Storage A	\$10.00	\$17.00	Monday
lished	Storage A	\$10.00	\$17.00	Monday

⚠ The Tails header in all currency's columns syncs with the currency converter in “Inventory!G2”; the default is “\_usd”.

	G	H	I	J
	Currency			
	USD			
Script cell				
tion	Stock Location	Unit Cost	Unit Price	Days per Reorder
		Script column	Script column	
tion	Tr stock_location	unit_cost_usd	unit_price_usd	days_per_reorder
ulated	Storage A	\$10.00	\$17.00	Monday
atte finish	Storage A	\$10.00	\$17.00	Monday
lished	Storage A	\$10.00	\$17.00	Monday

## ➤ Stock low indication

Stock low indication present by “is\_stock\_low” column in Inventory sheet.

Condition:

If “reorder\_level” > “stock\_qty”

Then “is\_stock\_low” = “LOW”

And the rows that “is\_stock\_low” = “LOW” will change to **blue**.

reorder_level	reorder_qty	is_discontinued	stock_qty	inventory_value	is_stock_low
10	30	no	7	70.00	LOW
10	30	no	1	10.00	LOW
10	30	yes	0	0.00	LOW
10	20	no	10	150.00	OK
10	20	no	21	315.00	OK
10	20	no	40	520.00	OK

## ➤ Entry form

Used to simplify adding new data to the table's last row.

**How to use:**

1. Fill all the forms.

## ➤ Auto fill cost and price

Automatically fills price values from [Inventory\[unit\\_cost\]](#) and [Inventory\[unit\\_price\]](#) into [Costs\[unit\\_cost\]](#) and [Sales\[unit\\_price\]](#).

These values are filled using Apps Script to ensure that when you update prices in the Inventory sheet, the previously recorded prices in the Costs and Sales sheets remain unchanged.

### How to use:

Just fill in the [date](#), [sku](#), and [qty](#) columns. The price values will be copied automatically.

## ➤ Date Filter

Filtering data in the table according to date range

### How to use:

- For **Costs, Sales, Expenses** sheets.

Format: **m/d/yyyy**

Example: **2/1/2024**

- For **Transactions Combined, Profit Loss, and Dashboard** sheets.

Format: **mmm yyyy**

Example: **Jan 2024**

- You may leave the cells blank to indicate “infinite”. See the example below.

## ❖ List of Formula

### ➤ Inventory Sheet

- **Purpose:** Store all product data. (Enter your product details here before filling in any other sheet.)
- **Formulas:**
  - stock\_qty N8 :  

```
=arrayformula(IF(inventory[sku]="", "", IFERROR(SUMIF(purchases[sku], inventory[sku], purchases[purchase_qty])-SUMIF(sales[sku], inventory[sku], sales[sale_qty]), 0)))
```
  - inventory\_value 08 :  

```
=arrayformula(IF(inventory[sku]="", "", inventory[unit_cost_usd]*inventory[stock_qty]))
```
  - stock\_low\_indication P8 :  

```
=ARRAYFORMULA(IF((inventory[reorder_level])+(inventory[stock_qty])="", "", IF(inventory[stock_qty] < inventory[reorder_level], "LOW", "OK")))
```
  - Total Inventory Value D2 :  

```
=SUBTOTAL(109, inventory[inventory_value])
```

## ➤ Costs Sheet

- **Purpose:** Record purchase (stock in) transactions.

- **Formulas:**

- category D8:

```
=Arrayformula(IF(purchases[sku]="", "", VLOOKUP(purchases[sku], inventory[sku]:inventory[unit_price_usd], 2, FALSE)))
```

- subcategory E8:

```
=Arrayformula(IF(purchases[sku]="", "", VLOOKUP(purchases[sku], inventory[sku]:inventory[unit_price_usd], 3, FALSE)))
